Founded in Miami - Florida, **PHARMABOX** is a local business that has developed the first automated retail system for over-the-counter and personal care pharmaceuticals products.

**PHARMABOX** is an innovative service platform with a state-of-the-art system that provides immediate first-line products based on health care and management, distributing the best brands on the market, accessible 24 hours a day, 7 days a week.

Our mission is to offer the safest, simplest and most effective way to obtain top-brand OTC products in highly-frequented yet underserved areas.

**THE BENEFITS OF PHARMABOX ARE  
SUMMARIZED BY A SIMPLE WORD:**

**ACCESSIBILITY**  
**IT'S A PHARMACY AT YOUR FINGERTIPS.**

Our automated kiosks have an easy access system; through the touch screen you can view our wide range of products, locate them by category, make individual or multiple purchases, accumulate points and get discount coupons... with the best market prices!

**PHARMABOX** is a new and versatile service system that can be located in malls, universities, airports, train stations and many other places of mass circulation or unattended areas, where access to a traditional brick and mortar store is difficult. The system can act as a quick, easy and accessible method to get needed items and OTC medicines into the hands of people within communities that are disadvantaged, have poor public transportation, or, for any of a variety of reasons, are off the radar for the big box stores.

**FIRST AID KIT DESIGN**

Pharmabox is designed to resemble a first aid kit, immediately generating the feeling of being able to solve an unexpected or personal need related to the pharmaceutical or personal care area.

**PHARMABOX REQUIREMENTS:**

- Electric point of 25amp.
- Space measurements (98 " / 43" / 93 ")

IT'S A PHARMACY AT **YOUR FINGERTIPS.**

## THE NEED

According to The Consumer Healthcare Products Association (CHPA), consumers make over 2.9 billion trips per year to retail stores to purchase over-the-counter (non-prescription) medicines and 81% of adults use OTC medicines as a first response to minor ailments. Nearly seven in 10 parents have given their child an OTC medicine late at night to help treat a sudden medical symptom.

In the US alone, the total retail sales for OTC medication reached more than \$8.5 billion in 2015. For OTC pediatrics, the total sales exceeded \$1.7 billion in 2015.

Pharmabox can cut the time it takes to get crucial medications by placing these innovative, automated kiosks in convenient locations. Moreover, **PHARMABOX** helps put these medicines into the hands of people when and where they need it, thereby becoming an important link in the nation's healthcare delivery system.

**PRODUCT PORTFOLIO:** We customized the product portfolio based on market needs.

## WHAT MAKES US UNIQUE IN THE MARKET?

THE BLISS OF A HASSLE-FREE VENDING MACHINE

**1 PHARMABOX** is solely responsible for the services and replenishment of all automated systems. No sub-contractors are involved.

\*We offer service 24/7. Our system provides a unique feature for remote troubleshooting.

\*Its advanced software runs real time and remote inventory reports, allowing for easy same-day or next-morning replenishment. A notification will be sent automatically to us once a product is low.

**2** Refunds are easy! The machine's sensor will not charge the user unless the product has been removed successfully by hand from the bin.

**3 PHARMABOX** technology offers the highest ROI in the industry of vending machines.

## PHARMABOX UNIQUE TECHNOLOGY

**Pharmabox is available 24/7.**

It accepts bills, coins, credit cards, Apple Pay and Android Pay. (Custom forms of payment e.g. airport card are also available upon request).

Each Pharmabox is made with a front safety glass and lighting, making it vandal-proof.

Its advanced system can offer and display any product regardless of shape or size: from boxes to bottles to envelopes!

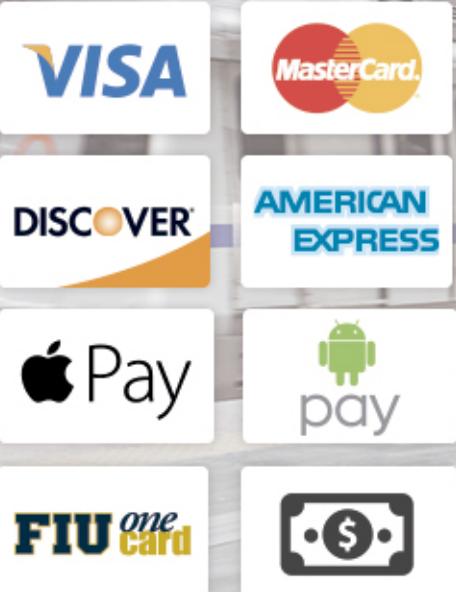

Promo codes and special discounts can be taken by the system.

The machine also provides receipts.

Our unique software provides ease of management and transparency of operations on each machine.

It creates daily and monthly reports that are easy to read, efficient, and accurate.

The interactive screens to the sides of the machines allow for custom messaging, advertising, etc.

## INCREASING SATISFACTION PHARMABOX

This convenient system helps increase customer satisfaction. Whether in a hotel, an airport, a hospital, a mall, a business center, college, or apartment complex, the Pharmabox helps give people the items they need in a convenient manner.

In many areas, having a Pharmabox nearby can lead to higher healthcare and personal care utilization. By providing items people need, including cold and allergy medicines, STD barriers, soaps, sanitizers, and over 135 other necessities, the Pharmabox can reduce trips to the emergency room and urgent care, and can increase healthcare delivery nationwide.

Pharmabox not only helps people get the items they need quickly and conveniently, it also does so in an affordable manner, as most merchandise in Pharmabox is priced about the same as at any local brick and mortar store.

## IN SHORT, PHARMABOX IS A CONVENIENT SOLUTION

Unlike other vending machines, its advanced technology not only provides the highest ROI in the market, but also a real hassle-free relationship.

### FOR THE CONSUMER:

From the mom who ran out of baby wipes, to the teenage girl who just got an allergic reaction and the millennial with a killer headache. PHARMABOX SOLVES THEIR OTC NEEDS.

### FOR THE AIRPORT:

From red-eye travelers, to those looking to avoid the long-lines (or long walks) of the retailers, Pharmabox is there for them 24/7.

### FOR THE MALL:

It's not adding technology to the mall, it's serving a necessity in the most technological and affordable way possible.

### FOR THE UNIVERSITY:

Pharmabox is there for students 24/7. In addition, offering OTC and first necessity items on-site allows the students to stay in the safe and convenient environment of their campuses. Our concept is unlike any other.
